

## KER-Flex™ Oral Joint Supplement

Joint problems can be a limiting factor in a horse’s career. Therefore, care and maintenance of joints is a major concern. At Kentucky Equine Research (KER), we have studied joint health and the management steps necessary to minimize problems. KER•Flex, a new oral joint supplement developed by KER, is suitable for all classes of horses engaged in various types of exercise.

KER•Flex contains a synergistic blend of glucosamine HCl and chondroitin sulfate to provide broad-spectrum support of joint health.

### Feeding Directions

*Loading Dose:* Add 2 scoops (30 g) per day to daily grain ration for 14 days.

*Maintenance Dose:* Horses in light to moderate work should receive 1 scoop daily. Horses in heavy work, those in need of additional joint protection, and horses weighing over 1200 lb should receive 2 scoops daily. (1 scoop = 15 g)

### Active Ingredients

Nutrient	Per 15 g
Glucosamine HCl* .....	10,000 mg
Chondroitin sulfate* .....	2,000 mg

*\*Not recognized as an essential dietary nutrient*

### Storage

Store in a cool, dry place. Reseal lid during storage.
