

## KER-Flex™ Oral Joint Supplement

Joint problems can be a limiting factor in a horse's career. Therefore, care and maintenance of joints is a major concern. At Kentucky Equine Research (KER), we have studied joint health and the management steps necessary to minimize problems. KER-Flex, a new oral joint supplement developed by KER, is suitable for all classes of horses engaged in various types of exercise.

KER-Flex contains a synergistic blend of glucosamine HCl, chondroitin sulfate, MSM and hyaluronic acid to provide broad-spectrum support of joint health.

### Daily Supplementation

*Loading Dose:* Add 2 scoops (30 g) per day to daily grain ration for 14 days.

*Maintenance Dose:* Horses in light to moderate work should receive 1 scoop daily. Horses in heavy work, those in need of additional joint protection, and horses weighing over 1200 lb should receive 2 scoops daily. (1 scoop = 15 g)

### Guaranteed Analysis

Nutrient	Per 15 g
Glucosamine.....	5000 mg
Chondroitin.....	1000 mg
MSM.....	1000 mg
Hyaluronic acid .....	100 mg

### Active Ingredients

Glucosamine HCl, chondroitin sulfate, methylsulfonylmethane (MSM), hyaluronic acid

### Storage

Store in a cool, dry place. Reseal lid during storage.
